

Akash Birhade

8459210421 | skybirhade@gmail.com | [linkedin.com/in/akash-birhade](https://www.linkedin.com/in/akash-birhade) | Mumbai, Maharashtra, India

PROFESSIONAL SUMMARY

Full-stack developer with 2+ years of experience building scalable web applications using modern JavaScript frameworks. Expertise in React, Node.js, and cloud technologies including Docker and Python/Django. Proven track record of delivering high-quality frontend solutions with focus on performance optimization and user experience. Skilled in both frontend and backend development with strong foundation in TypeScript, PostgreSQL, and MongoDB.

TECHNICAL SKILLS

Frontend Technologies: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material-UI, Redux, Axios

Backend Technologies: Node.js, Express.js, Django, Python, RESTful APIs, GraphQL

Databases: MongoDB, PostgreSQL, SQL, Mongoose ODM

DevOps & Tools: Docker, Git/GitHub, Postman, VS Code, Mongo Compass, Chrome DevTools

Cloud & AI: Generative AI, Cloud Deployment, CI/CD Pipelines

Methodologies: Agile/Scrum, Test-Driven Development, Responsive Design, API Integration

PROFESSIONAL EXPERIENCE

Frontend Developer

Periscope-Tech

March 2025 – Present

Mumbai, Maharashtra

- Architected and developed responsive user interfaces using React.js and TypeScript, improving application performance by implementing code-splitting and lazy loading techniques
- Collaborated with cross-functional teams to translate design mockups into pixel-perfect, accessible web components ensuring seamless user experience across multiple browsers and devices
- Optimized frontend build processes and implemented best practices for state management, reducing page load times and enhancing overall application scalability
- Integrated RESTful APIs with frontend components, implementing error handling and loading states to improve user feedback and application reliability

React Developer

Viser Solutions

July 2023 – May 2025

Navi Mumbai, Maharashtra

- Developed and maintained multiple production-grade web applications using React.js, Material-UI, and TypeScript, serving thousands of users with 99.9% uptime
- Implemented complex state management solutions using Redux and Context API, reducing prop drilling and improving code maintainability by 40%
- Built reusable component library following atomic design principles, accelerating feature development and ensuring UI consistency across projects
- Integrated third-party APIs and implemented authentication flows, enhancing application functionality and security
- Conducted code reviews and mentored junior developers on React best practices, TypeScript patterns, and modern JavaScript techniques

MERN Stack Development Intern

Naresh i Technologies

February 2023 – June 2023

Hyderabad, Telangana

- Completed intensive 5-month internship program covering full-stack JavaScript development with MongoDB, Express.js, React.js, and Node.js
- Built end-to-end web applications including RESTful API development, database schema design, and responsive frontend interfaces
- Implemented CRUD operations with MongoDB and Express.js, creating secure and scalable backend services with proper error handling and validation
- Utilized Git version control and Agile methodologies for collaborative project development and code management

EDUCATION

SSBT's College of Engineering & Technology

Bachelor of Engineering in Civil Engineering

Bambhori, Maharashtra

2018 – 2020

KEY ACHIEVEMENTS

- Successfully transitioned from civil engineering to software development through self-learning and intensive bootcamp training
- Contributed to multiple high-impact projects resulting in improved user engagement and application performance metrics
- Demonstrated expertise in modern development practices including Docker containerization and CI/CD pipeline implementation
- Maintained consistent track record of delivering projects on time while adhering to coding standards and best practices
